You might be able to float in mid-air. Godfrey will be floating a volunteer from the audience in mid-air. Godfrey says, "Floating a child in the air is one of the funniest and most exciting pieces of magic that I perform. I get someone out of the audience to perform the illusion with me."

Godfrey's magic show is an award winning act that is performed all over the United States. This family show will be enjoyed by people of all ages. Godfrey specializes in audience participation. You will simultaneously laugh and be amazed by his spellbinding magic.

Godfrey has been a full time professional magician since 1982. Godfrey started magic as a hobby when he was only eight years old.

As a young child Godfrey was stricken with asthma and could not play sports. He spent his free time at the school library where he started reading magic books. Godfrey has worked since childhood to perfect his comedy and magic.

After graduating from high school, Godfrey traveled with a small circus side show, "Circus of the Fantastic." On the show was Spongie the Sponge Girl, who's body was made out of sponge; Miss Electra, who could take 50,000 volts of electricity through her body; and Amanda the Indestructible Child, who could walk barefoot on a ladder of razor sharp swords. The experience he gained in traveling with this circus has helped Godfrey become an outstanding showman.

Godfrey has performed several times at the prestigious Magic Castle in Hollywood, where only the world's best magicians entertain. He has performed at the leading fairs, schools, private functions and corporate events in the United States.
